The Role of Cytogenetics in Hematolymphoid Malignancies

Thursday, January 28th, 2021

[REGISTER HERE](#)

About the Webinar:

Cytogenetics has played a pivotal role in diagnosis, risk stratification and prognosis of hematolymphoid malignancies and thus has significantly improved survival and outcomes in these patients. Dr. Dhanlaxmi Shetty, will unravel the role of conventional and molecular cytogenetics in various leukemias and lymphomas while providing an overview of basic techniques in cytogenetics.

This webinar is intended for individuals who would like to learn or refresh their knowledge on cytogenomic approaches in diagnostic services.

This educational webinar is brought to you by:
